OK. Who ever over pulls the RnB pipe can tear that out. What is your timing on possible bidder visit? It looks like I will be in Silverton on the 8th for a DRMS pre bid meeting, so the 9th could work well for me.

Matt,

I was up at the GK today and things look good. The one thing that will need to happen before the season ends is to open the channel up more where the road crossing is. As configured now, the spring run-off will blow out the road otherwise down below the creek versus running down the channel. It's great right now to drive across.

Also, it would be good to talk tomorrow afternoon or Wednesday after I meet with Todd and our management down here.

Thanks,  
Steve
